This appendix to the blog entitled 'Can the Netherlands' digital infrastructure withstand a knock?' contains additional statistics to supplement the graphs presented the blog. The additional data relates to the resilience and dependency of several sectors: banking, education, central government and transport. Also presented in the appendix are statistics for the Netherlands' 500 largest companies, as listed by *EW magazine*. For each group, separate data is provided regarding IPv4 resilience and IPv6 resilience.

Banking

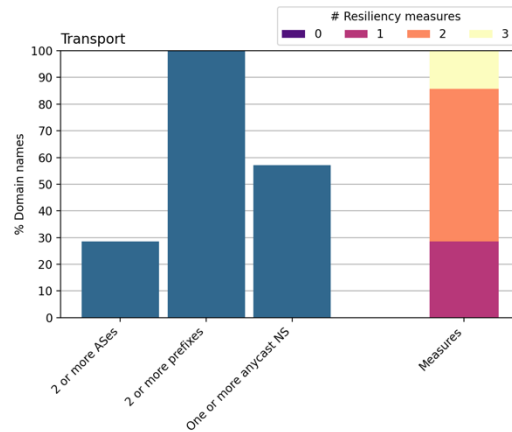

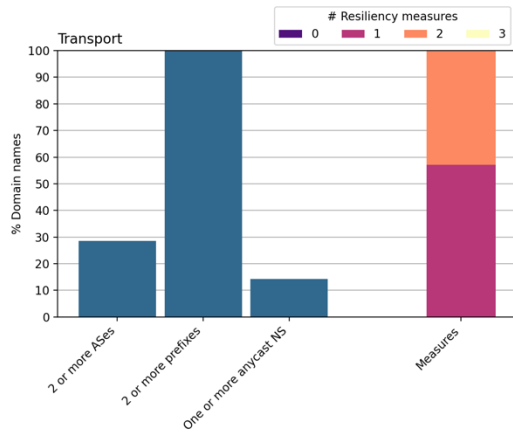

Source: <https://thebanks.eu/articles/major-banks-in-the-Netherlands>

*Measures taken to boost the resilience of domain names:
banking, IPv4 and IPv6.*

Transport

Source: manually extracted data from eindhovenairport.nl, portofrotterdam.com, klm.com, ns.nl, prorail.nl.

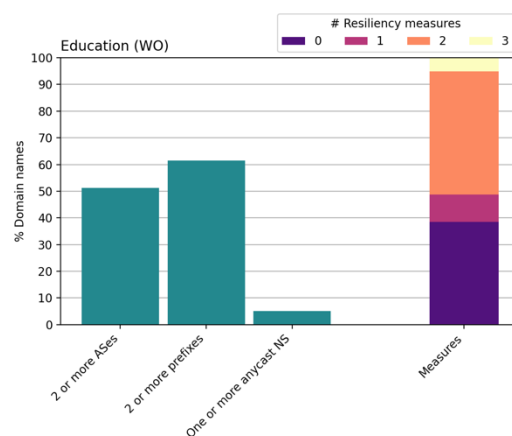

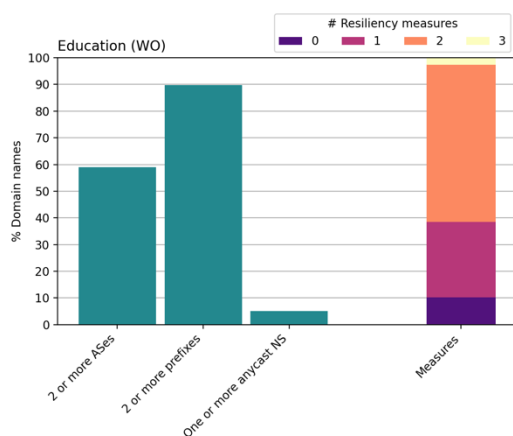

*Measures taken to boost the resilience of domain names:
transport, IPv4 and IPv6.*

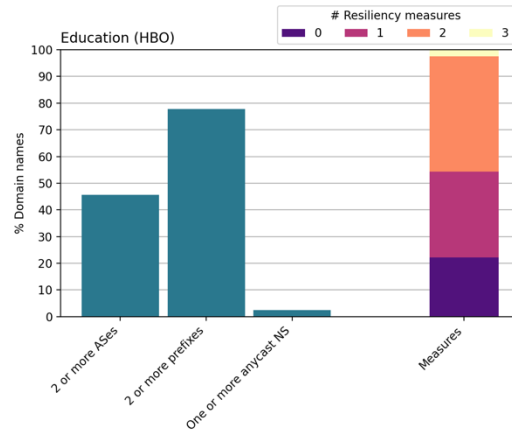

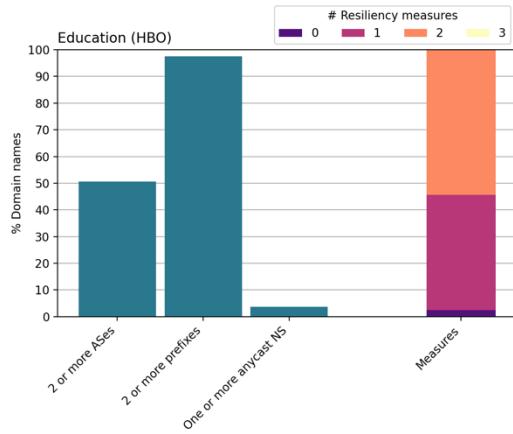

Education

Source: <https://onderwijsdata.duo.nl/datasets/overzicht-erkenningen-ho>

Manually compiled list of university domain names.

*Measures taken to boost the resilience of domain names:
universities, IPv4 and IPv6.*

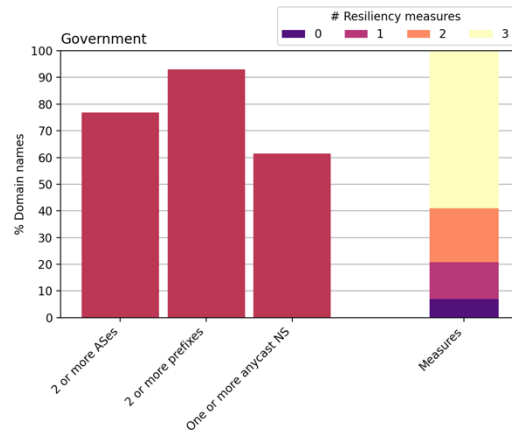

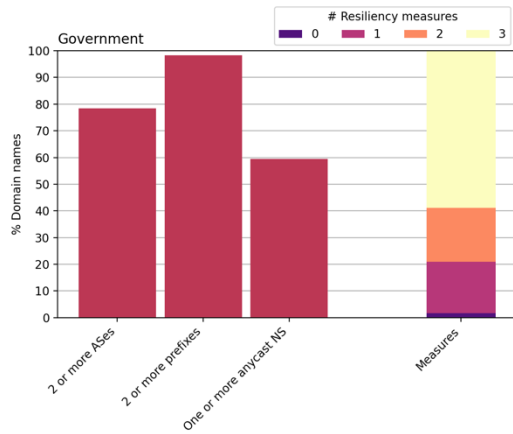

*Measures taken to boost the resilience of domain names:
higher vocational colleges, IPv4 and IPv6.*

Central government

Source: <https://www.communicatierijk.nl/vakkennis/rijkswebsites/verplichte-richtlijnen/websiteregister-rijksoverheid> (August 2024).

Second-level domain names only.

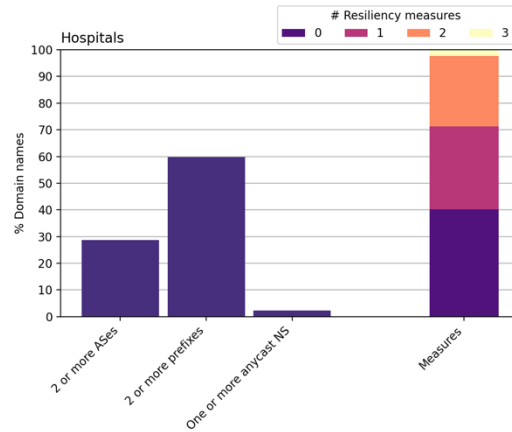

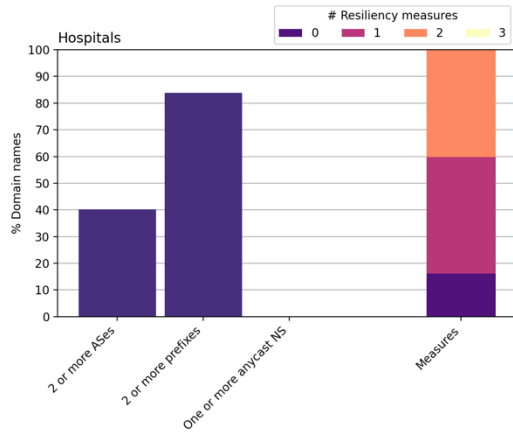

*Measures taken to boost the resilience of domain names:
central government, IPv4 and IPv6.*

Hospitals

Source: <https://www.vzinfo.nl/ziekenhuiszorg/regionaal/locaties>

Manually compiled list of domain names of university hospitals and general hospitals.

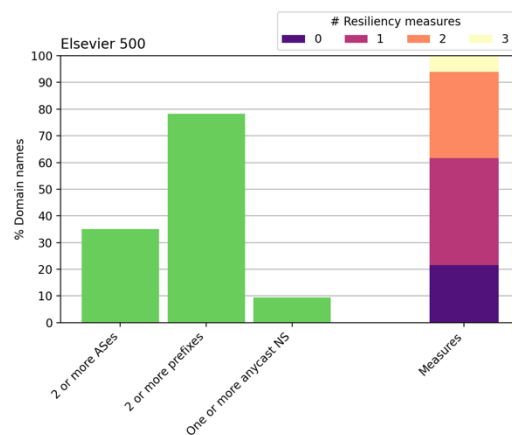

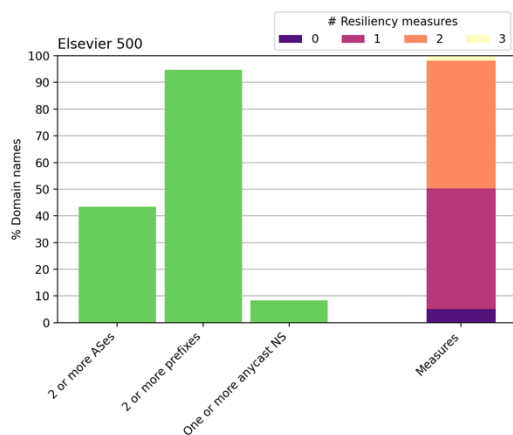

*Measures taken to boost the resilience of domain names:
hospitals, IPv4 and IPv6.*

EW Top 500

Source: <https://www.ewmagazine.nl/economie/achtergrond/2022/11/dit-zijn-500-grootste-bedrijven-van-nederland-32126w/>

A list of relevant companies' domain names was compiled using ChatGPT, with the company name as input, then manually verified.

*Measures taken to boost the resilience of domain names:
top 500 companies, IPv4 and IPv6.*
